**OWNER** - Unknown

**PROTECTION** - Property of public interest (Decree n. 35909 of 17/10/1946, n.º95)

## DESCRIPTION

**MATERIAL** - Granite

**DIMENSIONS** - 141cm x 36cm x 26cm

**TECNICAL DESCRIPTION** - Parallelepiped granite landmark, from curved finish and highly polished granite face, presenting on the face main, facing the path, the inscription "FEITORIA R 1761", distributed over three lines. Some gaps in the edges.

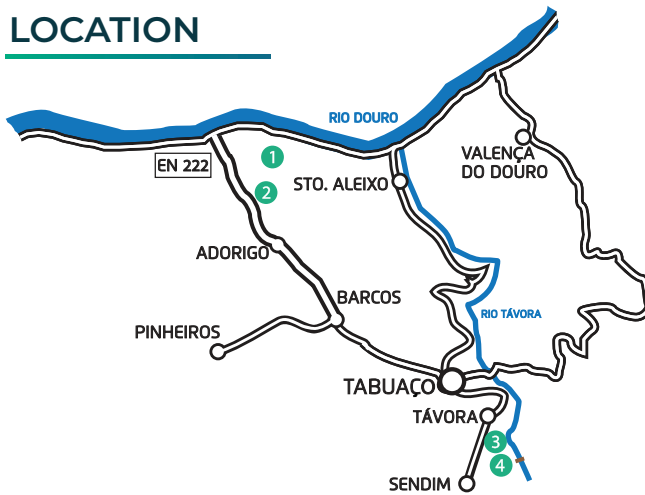

**HISTORICAL DESCRIPTION** - Sixth milestone of the sum and addition to the demarcation at the Tedo site, placed on top of the vineyards of Henrique Gabriel da Silva, on the way from Tedo to Santa Leocádia, paid by the land owner. Still in the same place, overlooking the road that connects the mouth of Tedo and Adorigo, in an area of shrubby vegetation with traces of walls to support vineyards.

The bottom two lines of the epigraph appear to be a modern addition, not just because they feature cut and scale different from the top, but also because when the vineyards from Além Douro, consulted by Álvaro Moreira da Fonseca, specify which letters are inscribed in this frame. It is likely that someone wanted to "complete" the application so that it would look like the landmark located next to the neighboring farm in Valongo.

**STATUS/CONSERVATION** - Reasonable. Various lichen stains and some mosses. Needs biocide treatment and enveloping cleaning.

## LANDMARK IN AVELEIRA FARM

**LOCATION** - Aveleira Farm – Távora, Tabuaço

**ACCESS** - Road 323

**GPS COORDINATES** - 41° 05' 25.02"N / 7° 30' 54.19"W

**OWNER** - Maria Fernanda Soeiro Macedo Pinto

**PROTECTION** - Property of public interest (Decree n. 35909 of 17/10/1946, n.º95)

### DESCRIPTION

**MATERIAL** - Granite

**DIMENSIONS (cm)** - 126cm x 47cm x 17cm

**DEMARICATION DATE** - 02/05/1761

**TECHNICAL DESCRIPTION** - Parallelepiped granite landmark with smooth finish, presenting on the main face, facing the path, the inscription "FEITORIA", distributed by two lines. Is embedded in the wall of the public path, so the side and posterior faces are irregular.

**HISTORICAL DESCRIPTION** - Fourth milestone of the sum and addition of the demarcation of the site from Tedo to Távora, at the Aveleira site, placed in the corner of the chestnut at the São Pedro das Águias Convent. Álvaro Moreira da Fonseca locates it on the wall in the Aveleira Farm, near the Fumo Bridge, where it remains. This wall belongs to a public path that is obstructed by vegetation.

**CONDITION/CONSERVATION** - Reasonable. The vegetation on the way makes the access difficult and concentrates humidity, which justifies the amount of moss in the base. Needs surrounding cleaning and biocide treatment.
